

# MACROMOLECULE FOLDABLE

This will be on pages 16-17 in your notebook.

1. Follow the instructions from the teacher on how to divide your papers and staple the pictures.
2. On the blank side, write the name of the macromolecule
  - Glucose -- **Carbohydrates**
  - Enzyme-Substrate Complex – **Proteins**
  - Three types of fats – **Lipids**
  - RNA/DNA – **Nucleic Acids**
3. Under the picture for each macromolecule, you should include the following information
  - **Function(s)** of the macromolecule
  - **Monomer**
  - **Elements** that make the macromolecule
  - **Examples** of the macromolecule
  - **2 other facts** about the macromolecule (can come from book or another source)
4. On the side of the picture where you wrote the name of the macromolecule, draw a picture or two to help you remember something about the macromolecule!
