

BW #19

- What would the complement side to this DNA strand be?
- A C A T G G A T G

C. Describe the process of DNA replication

DNA Replication

Why would DNA need to be replicated?

C. Describe the process of DNA replication

DNA Replication

What is DNA Replication?

- Making an exact copy of a DNA molecule
- Happens during Interphase
- Occurs in the Nucleus
- Essential in maintaining the correct chromosome number

C. Describe the process of DNA replication

DNA Replication
