

When you finish your revisions:

1. Come up and grab the short reading on Charles Darwin.

Take a few minutes to read through it.

2. Use a chrome book and do a little research of your own on Charles Darwin and his life.

### **3. IN YOUR NOTEBOOK:**

a. Glue the picture and quote of Darwin in the middle

b. Use arrows coming off of that picture to describe things that he did or saw or learned to help him come up with the idea that species adapt (you need 5 arrows minimum with short descriptions)
