

Organelles of the Cell

Cell Part	Function (What does it do? What is its job?)	Reminds me of... (comparison)
Plasma Membrane (Cell Membrane) <i>Orange</i>		
Cytoplasm <i>Yellow</i>		
Ribosomes <i>Black</i>		
Endoplasmic Reticulum <i>Smooth – purple</i> <i>Rough- light blue</i>	Smooth: Rough:	
Golgi Apparatus <i>Brown</i>		
Mitochondria <i>Red</i>		
Lysosomes <i>Tan</i>		
Vacuole <i>White</i>		
Chromatin/ Chromosomes <i>No color</i>		
Nucleus <i>Pink</i>		
Nucleolus <i>Dark blue</i>		
Centrioles (animal cell only) <i>Green</i>		
Cilia (or Flagella) (animal cell only) <i>Gold</i>		
Cell Wall (plant cell only) <i>Dark green</i>		
Chloroplasts (plant cell only) <i>Light green</i>
