

Name _____

Speciation Viewing Guide

Speciation: An Illustrated Introduction

1. Describe the ancestor of all the Birds of Paradise.
2. What are 2 ways speciation can begin?
3. How could a group of birds end up on an island that would normally be too far away to fly to?
4. How many generations could it take for birds on the same island to become different species?
5. What type of selection led to the population on the opposite side of the island developing elaborate feather adaptations?
